

# CMS Based Web Application

**Index No:** 18000916

**Name:** Nimeshika Lakmali

**Web Site Details:**

**URL** : <http://easysgoo.byethost15.com/>

**User Name** : admin

**Password** : admin123

After I followed the CMS lab sheet, I tried to build web application in localhost using Joomla. To enable free hosting, I created my web application on the Byethost free hosting site.

**Work Process:**

1. Hosted my web site in Byethost.
2. Added protostar template, added logo, articles and banner, changed template and background color of my site.
3. Added media extension. For that Responsive CSS3 slider extension.
4. Added menu that is Contact Us. It includes about contact details.
5. Added menu that is location and it includes location of head office using Google map.
6. Added Youtube menu for more information.
7. I have installed VirtualMart extension to add this site products and shopping carts.
8. I already have a paypal account. So I added Paypal standard method as the payment gateway.
9. Added flipping book extension.
10. Added chat box from installing onwebchat extension and I already have created account in onwebchat.
11. Added securitycheck extension for site protection.
12. Added Redirect on login extension and Akeeba Backup.

**Problems/ Error faced:**

- 01) When I added media extension to the all pages, products' shopping cart was disappeared.
- 02) I installed fabrik extension properly. I tried to add features using fabrik extension, but I was unable to add them.
- 03) Already I completed the web application in localhost using Joomla, but I couldn't be able to hosted it. Because to hosted a web application for free requests a minimum size of the website.

**Solution:**

- 01) I removed media extension from product page and added it other pages.
- 02) Recreated web application in the byethost free hosting site.

**08) After confirm payment, pay by  
logging to the paypal**

A screenshot of the PayPal payment interface. At the top left is the PayPal logo. At the top right is a shopping cart icon followed by the text "€2,450.00 EUR". The main heading is "Pay with PayPal". Below it is the instruction "Enter your email or mobile number to get started." There is a text input field with the placeholder "Email or mobile number". Below the input field is a link "Forgot email?". A large blue button labeled "Next" is positioned below the input field. Below the "Next" button is a horizontal line with the word "or" in the center. Below this line is a grey button labeled "Pay with Debit or Credit Card". At the bottom left, there is a link "Cancel and return to hewapathiranask@gmail.com". At the bottom left, there is a language selection menu showing a flag icon, a dropdown arrow, and the text "English | Français | Español | 中文".

## 12) Security check

Securitycheck | Control Panel

Joomla! would like your permission to collect some basic statistics.

To better understand our install base and end user environments it is helpful if you send some site information back to a Joomla! controlled central server. No identifying data is captured at any point. You can change these settings later from [Plugins > System - Joomla! Statistics](#). [Select here to see the information that will be sent.](#)

If you have problems, maybe they have been solved in the [forum](#).

### 13) Akeeba backup

The screenshot shows the Akeeba Backup Joomla! extension interface. At the top, there's a header with 'Active Profile: #1' and a dropdown menu showing '#1. Default Backup Profile'. Below this is a 'One-click Backup' section with a large green play button icon and the text 'Default Backup Profile'. To the right, a 'Status Summary' box contains a warning icon and text: 'Akeeba Backup is ready to backup your site, but there are potential issues'. Below this, it lists 'Default output directory in use'. Further down, it says 'Akeeba Backup Core 7.2.1 (2020-06-17)' and provides buttons for 'CHANGELOG', 'Donate via PayPal', and 'Reload update information'. On the left, a 'Basic Operations' section has four icons: 'Backup Now' (play button), 'Manage Backups' (list icon), 'Configuration' (gear icon), and 'Profiles Management' (people icon). At the bottom, an orange banner reads '★ Make your life easier' and describes the features of Akeeba Backup Professional, including scheduled backups, cloud storage integration, and restoration tools.

### 14) Redirect on login

The screenshot shows the Joomla! administrator interface for the 'Redirect on Login' plugin. The top navigation bar includes 'Info & Support', 'Options', 'Frontend', and 'Backend'. The 'Options' tab is selected. The 'Status' section shows 'State Redirect-on-Login' with radio buttons for 'Enabled' and 'Disabled', where 'Disabled' is selected. Below this, the 'Plugin status' for the 'user plugin' is shown as 'Plugin is installed' and 'Plugin is enabled'. The 'system plugin' status is also shown as 'Plugin is installed' and 'Plugin is enabled'. The 'Redirect order' section lists the general order of redirection: 1. User specific redirect, 2. Usergroup/accesslevel redirect, 3. Redirect for all users, and 4. Joomla's default. The 'Version' section is partially visible at the bottom.

Experience:

What I learned?

- Learned how to use CMA based application.

- How to use various extensions
- Find solution for errors.
- How to host web site.
- Learned idea about How to develop web site.
